

A strong democracy requires that we -- the citizens -- receive our news from various sources that air differing views. Having various news and media outlets controlled by a few corporations threatens our democracy. I am vehemently opposed to your intention to deregulate ownership of media companies. The charge of the FCC is to serve the people. America's democracy will be sorely compromised if you allow a few companies to run all the media outlets in the country. Please do not permit further consolidation of our media outlets.
